Education

Diplôme en Développement Web (Associate Degree)

ISTA NTIC SYBA | 2024 – 2026 (Expected June 2026)

Mathematics, Physics, and Computer Science
Faculté des Sciences et Techniques (FST) | 2023 – 2024

Scientific Baccalaureate
(Physics & Chemistry) – With Honors 2022 – 2023

Skills

Programming Languages: JavaScript, TypeScript, Python, PHP, C++, C

Frontend: React.js, Astro, HTML5, CSS3, Tailwind CSS, Ajax, Vite

Backend: Laravel, Flask, FastAPI, Express.js, Inertia.js

Databases: MySQL, PostgreSQL, SQLite, MongoDB

AI / Machine Learning: NumPy, Pandas, Scikit-learn, LangChain, Data Preprocessing, Model Training, Model Evaluation

Tools & Platforms: Git, GitHub, Docker, Linux, Jira, SonarQube, Google Cloud, AWS, n8n

Concepts: REST APIs, Full-Stack Development, Debugging, Code Review, Software Development, Agile Development

Language

Arabic: Native
English: Advanced
French: Intermediate

summary

Currently working as a Software Engineer at Invinio (temporary role), while completing a diploma in Web Development (expected June 2026). Passionate about Artificial Intelligence and full-stack development, with hands-on experience building scalable web applications and integrating AI models. Motivated by designing impactful digital solutions, with a strong interest in applying AI to solve real-world problems. Awarded in a university Python data structures competition and actively participating in hackathons focused on language accessibility and inclusive technologies.

Professional Experience

Software Engineer | Jan 2026 – Present

I contributed across multiple areas of the company's accessibility platform, including testing, debugging, UI improvements, SEO optimization, and frontend development. I worked on the company's marketing website using Astro and Strapi, focusing on performance, accessibility, and WCAG compliance to ensure an inclusive user experience.

In addition to marketing-related work, I actively contributed to the SaaS accessibility engine by identifying and fixing bugs, validating features, and testing engine behavior and performance. I

collaborated closely with developers and designers to improve product quality, review implementations, and support continuous improvement processes while helping deliver scalable and high-quality solutions.

JavaScript Instructor – ENSA Marrakech Bootcamp | Feb 2026

- Taught JavaScript fundamentals (DOM, functions, control flow)
- Led hands-on coding exercises and real-world projects
- Mentored students in debugging and best practices
- Improved students' problem-solving and coding skills

Projects

Google Deep Mind – The Gemma 3n Impact Challenge | Jun 2025 – Oct 2025

Helped in Developing a web and mobile application enabling communication between Tamazight and non-Tamazight speakers through real-time translation. Built the platform by integrating a Google AI model to deliver accurate and smooth interactions. Collaborated under the supervision of an AI expert, closely observing the model fine-tuning process and gaining practical insights into AI development. Strengthened skills in web and mobile development, AI integration, and the design of accessible and inclusive solutions.

Coursezy – AI-Powered Online Learning Platform | Jun 2025 – Jan 2026

Developed an AI-powered online learning platform featuring an intelligent chatbot and personalized recommendations. Integrated Hugging Face APIs for model fine-tuning and enhancement of AI-driven features. Worked on full-stack development using React (TypeScript) and Laravel. Implemented real-time functionality using Pusher to improve user interaction. Contributed to building a scalable and responsive platform architecture. Technologies: React TS, Laravel 12, PHP 8.2, Tailwind CSS, Three.js, Cloudinary, Google Cloud, , LangChain

Afham Haqqak – AI Legal Assistance Platform | Apr 2026

Co-developed an AI-powered legal platform during the HEEC Business School of Marrakech Hackathon to simplify access to Moroccan law. Built a full-stack web application using React, Tailwind CSS, and FastAPI to analyze legal situations in Arabic, Darija, and French. Implemented a multilingual RAG system that processed over 5,000 legal documents into searchable segments and generated accurate, cited legal guidance with confidence scores and recommended next steps. Developed an interactive chatbot for follow-up questions and integrated a directory of legal support organizations to connect users with real services.

Technologies: React, Tailwind CSS, Vite, FastAPI, LangChain, , Hugging face, MySQL
