Moroco, Marrakech

Education

ISTA NTIC SYBA 2024-2026

Diplôme en développement web

faculté de science et technique 2023 - 2024

Mathematics, Physics, and Computer Science

Scientific Baccalaureate (PC) 2022 - 2023

With Honors

Technical Skills

Programming Languagest:

Python, JavaScript, PHP, C++, C

Web Development:

React.js, Astro, Laravel, Flask, FastAPI, Express.js, HTML5, CSS3, Ajax JS, Tailwind CSS, REST APIs, TypeScript, Inertia.js, n8n (workflow automation)

Databases:

MySQL, PostgreSQL, SQLite, MongoDB

ML/AI:

NumPy, Pandas, scikit-learn, data preprocessing, model training & evaluation, LangChain (AI agent)

Other:

Linux (Ubuntu), Docker, Git/Github, Jira, SonarQube, MCP, Agile, Google cloud, AWS

Language

- Arabic: Native
- English: Advanced
- French: Intermediate

Profile

Web Development Intern passionate about Artificial Intelligence, I am building a solid foundation in software engineering through hands-on web projects while independently deepening my knowledge in Machine Learning.

I am deeply motivated by designing scalable web platforms and exploring AI as a tool to solve real-world problems. Awarded in a university Python data structures competition and actively participating in several hackathons focused on language accessibility, I commit myself with rigor and ambition to create technological solutions with significant human and technical impact.

Projects and Experience

Software Engineer Intern

Jan 2026 - Present

Contributing to the development and improvement of accessible websites. Focused on implementing accessibility best practices, optimizing user experience for all users, and collaborating with the team to build efficient, maintainable web solutions.

teaching JavaScript in a web foundations bootcamp

Feb 2026

Contributed to the CGI-ENSA Marrakech Bootcamp, an intensive program focused on the foundations of the web and core software development principles. Led JavaScript sessions, teaching fundamental concepts such as variables, functions, control flow, and DOM manipulation. Guided participants through hands-on exercises designed to strengthen logical thinking and practical problem-solving skills. This experience enhanced my ability to explain technical concepts clearly, structure learning paths effectively, and mentor aspiring developers in a collaborative environment.

Google - The Gemma 3n Impact Challenge

Jun 2025 - Oct 2025

Development of an innovative web platform enabling Tamazight speakers to communicate easily with non-Tamazight speakers. The application is built on a fine-tuned Google model to provide accurate and smooth translations, facilitating real-time interactions.

I worked under the supervision of an AI expert (Gregory Kennedy), which allowed me to strengthen my skills in web development, AI model integration, and the creation of accessible and inclusive solutions.

Coursezy - AI-Powered Online Learning Platform

Contributed to the development of Coursezy, an innovative web platform, transforming online learning through Artificial Intelligence. The platform features an intelligent chatbot, advanced search, personalized recommendations, and an interactive experience for both students and instructors.

Under the guidance of AI experts, I participated in integrating Hugging Face API services for model fine-tuning, strengthening my full-stack web development skills and the creation of scalable, interactive educational solutions.

Technologies: Laravel 12, React TS, PHP 8.2, Tailwind CSS, Three.js, Cloudinary, Google Cloud, Pusher, LangChain (AI agent)
